DRAGONFLY 25

WEEKEND CRUISER & RACER

DESIGNER’S COMMENTS

We are happy to introduce you to this fun, fast and fantastic Dragonfly 25. The concept is simple, easy to sail even singlehanded, easy to trailer with a normal family car, and the mast can be stepped by one person only. A great daysailer, or weekend trimaran for cruising with family and friends, and great fun for racing. The boat sleeps 3 adults, or 2 adults and 2 children. Offered in two versions, Touring and Sport. For cruising the boat comes with sprayhood and closed cockpit tent. This is the all-purpose multifunctional multihull.

Dream on, as you enjoy the following.

THE DRAGONFLY 25 IS AVAILABLE IN TWO VERSIONS, TOURING AND THE MORE POWERFUL AND DYNAMIC SPORT

The Dragonfly 25 Touring comes as standard with a 10.5 m single-spreader rotating alloy mast. Furling self-tacking jib for single-handed sailing, and a fully-battened mainsail with sheet traveler in the cockpit. The Dragonfly 25 Sport has a taller 12

m carbon wing mast and a larger sail area.

Both versions have the same size hulls – it is exactly the same boat – the difference lies in mast, rig and sails.

SAILING A DRAGONFLY 25 IS A JOY

The Dragonfly 25 has been designed based on the new principle of higher volume floats. The volume of the outrigger is 150%, which gives the boat great stability and high acceleration. The new wave piercing design of the floats follows the latest concepts and the

newest trends in the multihull racing world. This is not only an advantage for the sailing qualities of the boat, but also when it comes to the sporty and sophisticated styling that characterises the Dragonfly 25. The boat is surprisingly dry to sail due to the hull design.

EXPLORE NATURE

You can anchor in shallow water anytime or even moor the boat on a sandy beach, and often simply jump ashore. Like this you can always find shelter from the wind on a leeward coast or throw an anchor out the back and tie up ashore to a tree – this feature is unbeatable.

MEMORIES THAT LAST A LIFETIME

Pull up the rudder, the kick-up centreboard and find your dream spot to beach the boat, where almost no other boats can go. Explore nature with your family, enjoy the evening with a fire on the beach – moments that will

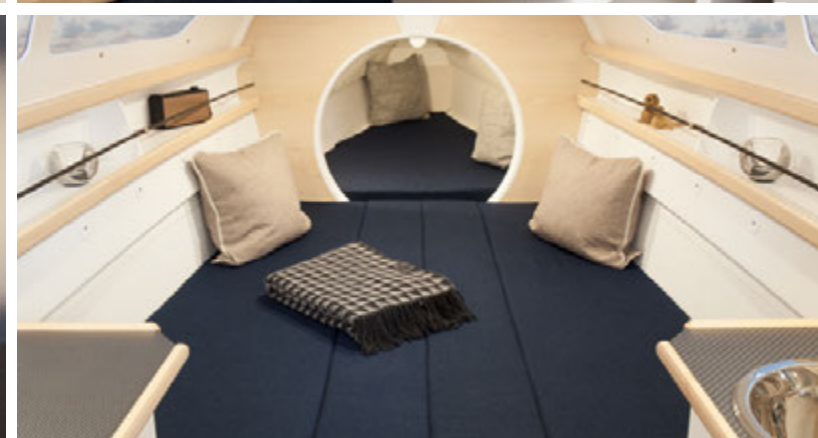

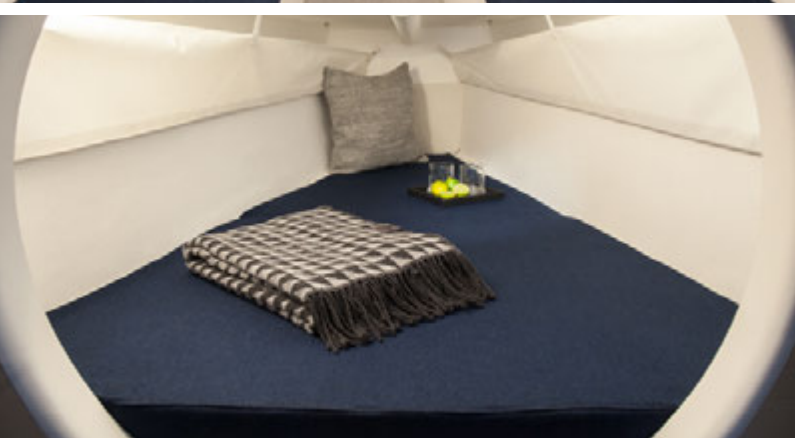

last. For anchoring, the Dragonfly 25 is a joy, as the boat stays stable all the time - like a big platform. The two big trampolines offer deck space usually expected on a much larger yacht.

EXCLUSIVE AND FUNCTIONAL INTERIOR

The Dragonfly 25 offers comfortable, high quality living quarters below deck. The big centreboard is located under the port side seat. In seconds, you can transform the main cabin into a full-size double berth by lowering the cabin table and fill in the backrest

cushions. The main cabin table also works as a cockpit table. The forward cabin offers comfortable sleeping for an adult or two smaller children. A portable chemical toilet is optional, located in the forward cabin below the V-berth.

TRAILERABLE AND FLEXIBLE

One of the key concepts of the Dragonfly 25 is how easy it is to trailer and launch. This is something you can do by yourself without a crane. Furthermore, the light weight makes it possible to handle the boat behind any medium-sized car.

The boat weighs approx. 1,150 kg ready for sailing and 1,800 kg including the trailer. The mast raising system allows one person to rig the boat, either ashore ready to sail from the trailer, or on the water.

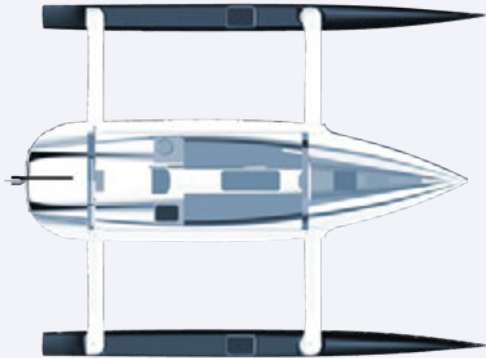

SWING WING SYSTEM

The Dragonfly 25 comes with our well-known Swing Wing system which we introduced more than 30 years ago. This means that the beam of the boat can be reduced from 5.8 m to 2.3 m within 2

minutes without using any tools by simply pulling one line by hand, and the boat fits into any regular marina berth or a container for shipping or storage.
