

DRAGONFLY 33

PERFORMANCE CRUISER

DESIGNER'S COMMENTS

Meet the NEW DRAGONFLY 33 PERFORMANCE CRUISER, the Evolution of an Icon. Combining the proven DNA of the DRAGONFLY 32 with the innovative design of the larger DRAGONFLY 36.

This is a fun, comfortable and versatile trimaran for offshore cruising in the fast lane, often with double digit numbers in speed. With 60 years of experience in design and production of world class trimarans, we have made our utmost to combine elegant and functional design with maximum comfort for easy handling with crew as well as for shorthanded sailing.

The Dragonfly 33 is offered in two versions; Touring with a standard 15.20 m carbon rig. For those who are looking for higher performance, we offer the Performance version, with a taller 17.20 m carbon rig and larger sail area.

Step inside and experience the elegant atmosphere of the high-quality wooden interior, illuminated by panoramic views through large cabin windows and natural down light from the flush-mounted skylight.

We hope you get inspired to unfold your horizons and we look forward to welcoming you onboard.

Jens & Peter Quorning

Owner's and head of Quorning Boats

FAST, ELEGANT & VERSATILE

The DRAGONFLY 33 represents the next generation of performance cruising trimarans. Built on the proven success of its predecessor, the DRAGONFLY 32, it combines the practicality, comfort and sailing characteristics owners love with a modern, elegant design.

The DRAGONFLY 33 features a spacious and modern dual-zone cockpit with twin wheels, an open stern and carefully integrated sail controls led back to the helm, creating an intuitive and comfortable sailing environment.

Combined with the wave-piercing hull design, a fixed bowsprit and the proven Dragonfly Swing Wing system, the DRAGONFLY 33 offers functionality, performance and elegance in perfect harmony. Easy to handle, exceptionally stable and fast in all conditions, it is equally suited for single-handed adventures, family cruising, offshore passages and weekend racing.

DRAGONFLY 33 IS AVAILABLE IN TWO VERSIONS, THE TOURING AND THE MORE POWERFUL PERFORMANCE VERSION

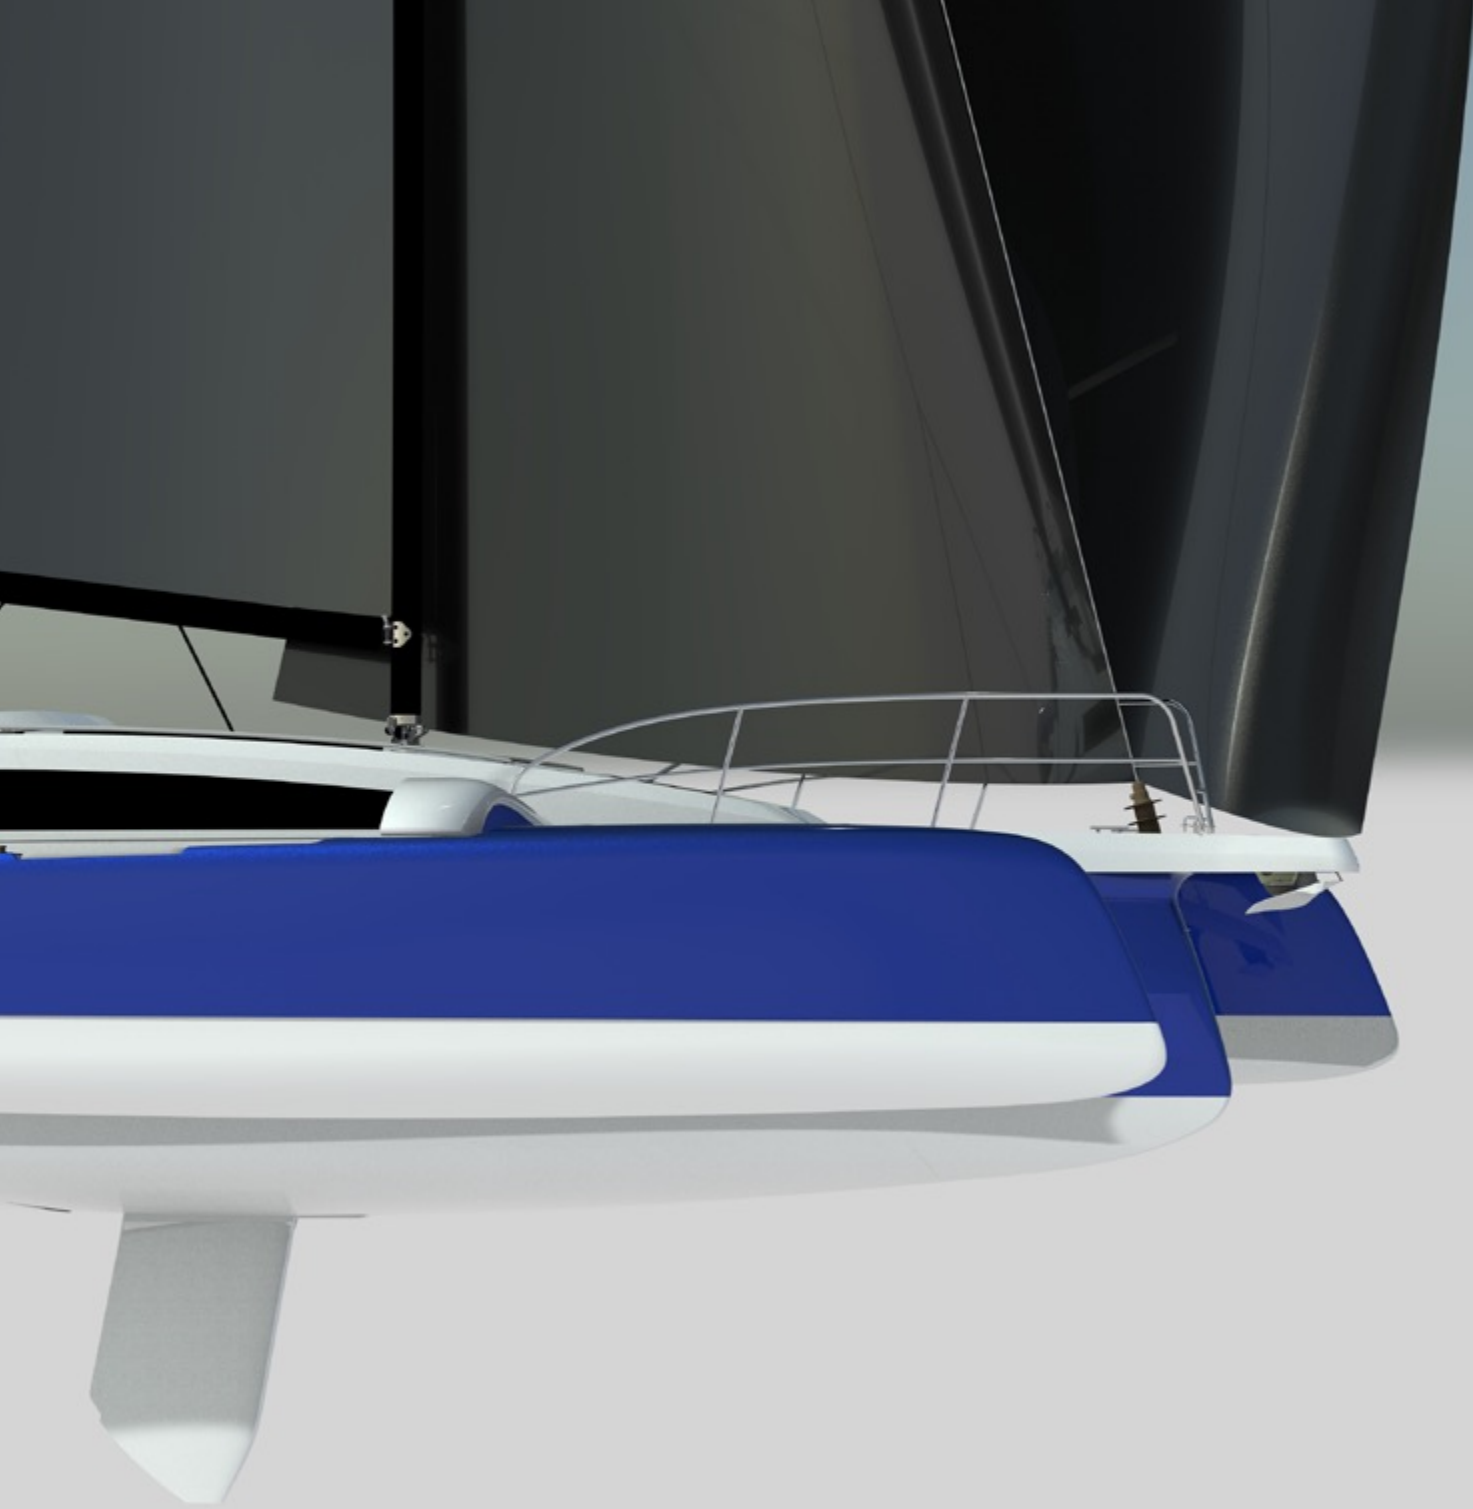

Both the TOURING and PERFORMANCE versions feature a revolutionary wave-piercing float and main hull design, ensuring a smooth and stable ride through any waters. Each model is equipped with a lightweight carbon mast, promising enhanced speed and agility.

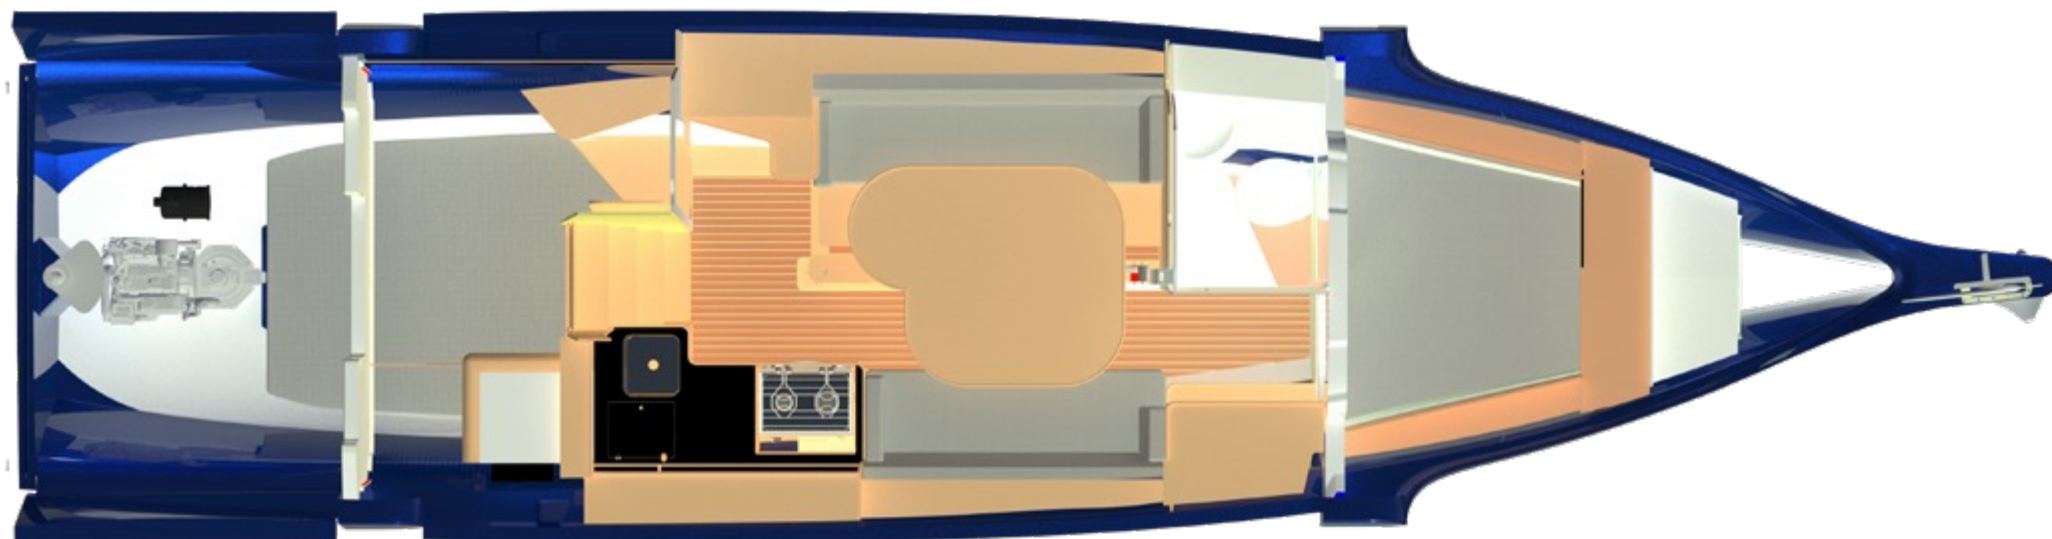

TOURING version: Designed for relaxed and confident cruising, the TOURING version offers intuitive handling and well-organized controls, making it an ideal choice for sailors with basic sailing skills who want to enjoy the speed, comfort and freedom of a Dragonfly Trimaran.

PERFORMANCE version: Created for sailors seeking an extra level of power and responsiveness, the PERFORMANCE version features a taller rig and larger sail area, rewarding more experienced sailors with exhilarating speed, precise handling and true performance-cruising potential.

Choose your adventure – whether it is the TOURING or the PERFORMANCE version, our trimarans are designed to meet your sailing dreams.

EXCLUSIVE AND ADAPTIVE INTERIOR

Below deck, the DRAGONFLY 33 welcomes you with a bright, inviting interior where comfort, functionality and clever use of space come together naturally.

Its compact and efficient layout provides generous accommodation, while large windows and deck hatches bring natural light into the main cabin and enhance the sense of openness.

At the centre, the saloon forms the social heart of the yacht, offering a spacious and welcoming area for dining, relaxing and planning the next adventure.

A comfortable 2.1 m forward V-berth, a large private aft cabin and additional saloon berths create flexible sleeping options for family and guests, supported by practical storage throughout.

The generously galley is neatly integrated with the main living area, and the separate head adds privacy and convenience, making the interior well suited for both weekend cruising and longer voyages.

Available in light Ash wood as standard, with elegant Elm wood as an option, the handcrafted interior reflects Dragonfly's Danish design tradition, craftsmanship and attention to quality and details.
